

COREL® DRAWings® PRO 2

The DRAW to Stitch Embroidery Software

Corel DRAWings 2 Pro was developed in response to real-life challenges faced in the embroidery industry – where creativity and production are often in a fine balance with deadlines and budgets. It combines the world famous graphics power of CorelDRAW® and the digitizing expertise of DRAWstitch® – enabling you to dynamically transfer designs back and forth between design and embroidery.

Complete, fast and easy to use, Corel DRAWings 2 Pro exceeds the most demanding applications of professional business establishments. It helps you to become profitable and competitive by:

- Creating professional quality embroidery designs in seconds
- Significantly reducing your digitizing costs
- Saving money by buying vector clipart instead of stock embroidery designs
- Offering more reliable quotes to your customers based on accurate stitch counts and 3-D material-based sewn-off images

Complete

Through its intuitive interface, Corel DRAWings 2 Pro can go from concept to completion without the time and expense required for traditional digitizing, making even small orders more profitable. You can control stitch direction, divide satin stitches, add sequence control to the design, and use advanced appliqué options along with enhanced control tools.

Corel DRAWings 2 Pro lets you convert any bitmap into cross-stitch, greatly simplifying the design process. It does the work for you – from determining template design to stitch density.

No further modules are necessary!

Fast

Corel DRAWings 2 Pro offers true vector design and digitizing, making linear workflow a thing of the past. Now you can work dynamically, back and forth between vector art and embroidery, increasing accuracy. Create, edit and change designs without having to redo steps – and see the stitching output immediately! Unleash the power of CorelDRAW, the world's fastest professional design program, with the ability to manipulate virtually any graphics files and export to industry-standard formats.

Easy

Corel DRAWings 2 Pro allows you to focus on the business of embroidery. Don't be dragged down by technical difficulties and time-demanding design decisions. Take full advantage of controlled automation with built-in, artificial intelligence and industry-standard VBA scripting.

Instantly convert a vector graphic into a digitized embroidery stitch file. As you assemble your design, Corel DRAWings 2 Pro recognizes the type of material being used, optimizes the stitch pattern, and automatically displays the result as it will appear in the embroidery! With the controlled automation process you can change almost everything in the stitch file – such as directions, density, underlays, and stitching order.

There's no need to start from scratch: Corel DRAWings 2 comes with 1,000 fonts and over 10,000 clipart images – and the ability to convert bitmap images into vector files.

Complete, fast and easy, Corel DRAWings 2 Pro is your obvious choice, allowing you to focus on the business of embroidery!

In addition to new features, such as Cross-Stitch, Sequence Control and Appliqué, DRAWings 2 Pro gives commercial operations extended control over embroidery designs.

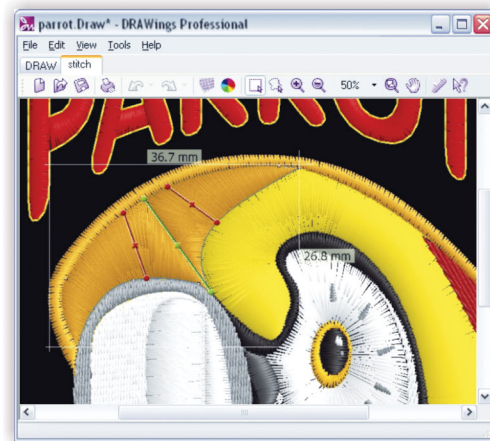

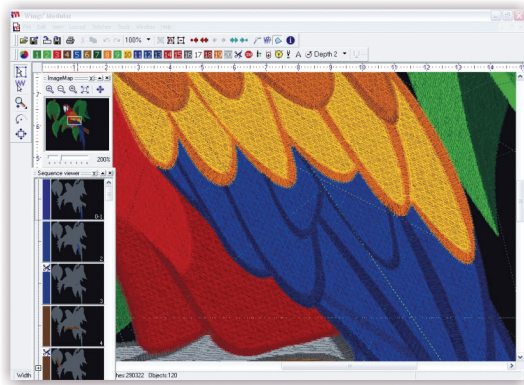

New Features Overview

Add direction control in Satin/Step – With this tool, you will enjoy more control over designs by choosing the direction of "Step" and "Satin" stitches to get the specific results you desire.

Add "divide" to Satin – You can now "divide" satin objects and specify how the outlines are split into satin bars. Objects are not increased, but rather split to internal branches. You now have the flexibility to customize the way satin objects are embroidered, creating the exact designs.

Add sequence control to design – You can now define the sequence in which the objects of designs will be embroidered. This tool is ideal for hats which need to be embroidered from the center to right and left. It is also useful for delicate fabrics that need special care during the embroidery process.

Wings' modular® embroidery software – Wings' modular provides industry professionals with a tool for viewing, modifying and exchanging embroidery design files. It is based on entry-level viewing and editing software used in the embroidery industry – with the addition of innovative design features and special functions.

Popular File Formats

Corel DRAWings 2 Pro offers the industry's most popular file formats:

- Save As or Export
- Wings Systems (.ngs)
- Tajima (.dst, .dsz, .dsb)
- SWF (.sst)
- PFAFF (.ksm)
- Happy (.tap)
- Melco expanded (.exp)
- Brother/Baby Lock/Bernina (.pec, .pes)
- Husqvarna (.hus)
- Husqvarna Viking/Pfaff (.vip)
- Janone (.jef, .sew)
- ELNA (.sew)
- JUKI (.M3)
- Toyota (.100)
- Mitsubishi HD (.1??)

Minimum System Requirements

- Windows® XP, Windows 2000 or Windows Tablet PC Edition
- Pentium® II-MMX/Athlon 1.3 Ghz CPU
- 256 MB RAM
- 800 MB of free, uncompressed hard disk space
- 4x CD-ROM drive
