

Corel DRAWings 2 embroidery software is ideal for small and home-based businesses. It combines the world famous graphics power of CorelDRAW® and the digitizing expertise of DRAWstitch® – enabling you to dynamically transfer designs back and forth between design and embroidery.

**Complete, fast and easy to use**, Corel DRAWings 2 exceeds the most demanding expectations of typical small and home-based businesses:

- Converts any vector artwork into embroidery with premium stitch quality
- Automatically calculates embroidery parameters such as underlay, compensation, branching, thread trimming and stabilizer requirements
- Provides real-time updates between your artwork design and stitch results

This unique edition of Corel DRAWings allows you to focus on creativity – and avoid getting stuck on the technical process of developing outstanding embroidery. You can take full advantage of instantaneous conversion without losing control.

### Complete

With outstanding text options, extensive appliqué abilities, patterns, fill and fabric selections, Corel DRAWings 2 offers everything you need in one box.

Corel DRAWings 2 can convert any bitmap into cross-stitch, greatly simplifying the design process. It does the work for you – from determining template design to stitch density.

**No further modules are necessary!**

### Fast

Corel DRAWings 2 offers true vector design and digitizing, making linear workflow a thing of the past. Now you can work dynamically, back and forth between vector art and embroidery, increasing accuracy. Create, edit and change designs without having to redo previous steps – and see the stitching output immediately! Go beyond merely importing vector files – and unleash the power of CorelDRAW, the world's fastest professional design program.

### Easy

With Corel DRAWings 2, you won't get caught up in the details, such as determining underlay and density of the stitches. Now it's easy to edit and combine existing designs and repurpose them for embroidery. You save time, giving you the opportunity to explore your creativity. Plus, learn quickly with a free lynda.com instructional CD and online support.

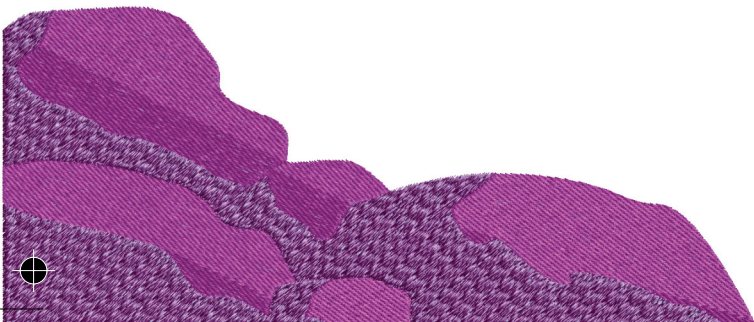

**There's no need to start from scratch:** Corel DRAWings 2 comes with 1,000 fonts and over 10,000 clipart images – and the ability to convert bitmap images into vector files.

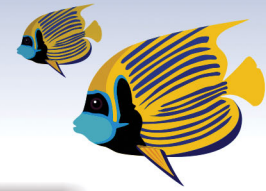

Complete, fast and easy to use, Corel DRAWings 2 is the only choice for small and home-based businesses.

### New Features Overview

#### Filter shapes to remove overlapping areas –

Using artificial intelligence, this tool applies an automatic filter to remove all overlaps between the objects of the vector designs, avoiding layering of stitches on fabric and dramatically reducing the overall number of stitches applied. You are also given the ability to manually alter the overlapping status of each object.

**Add sequence control to individual shapes** – You can now easily change the embroidering sequence of designs (send to front/back). Specific objects in the design can be designated to be embroidered at the start or at the end of the embroidering process, giving you the ability to embroider a design in the order you choose.

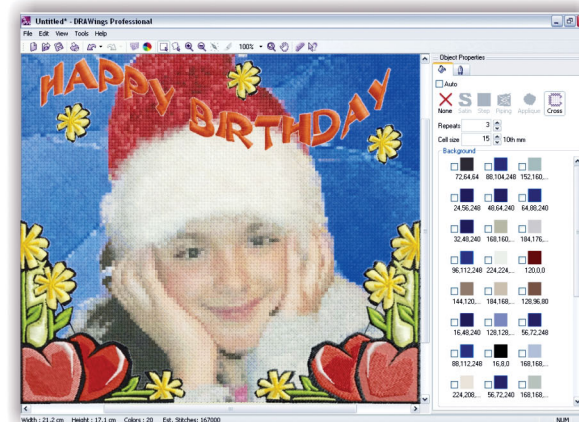

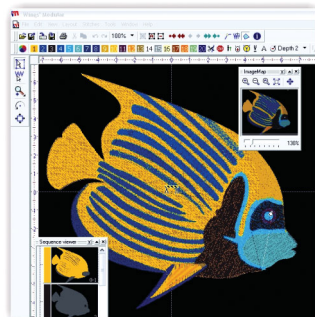

**Improved speed of data transfer from "DRAW" to "stitch" tab** – The speed of data transfer between the "DRAW" and "stitch" tabs has been dramatically improved, enabling you to produce more embroidery designs in less time.

**Convert bitmap objects to cross-stitch** – Any (RGB) bitmap imported in DRAWings 2 can be immediately converted to a perfect embroidery design in cross-stitch. DRAWings 2 also takes care of resolution and color reduction. This new feature provides a remarkably easy and quick way to make cross-stitch designs.

**Appliqué** – You can now enjoy new styles for holding appliqué and easily retain a number of appliqués on the fabric with multiple Zig-Zag styles.

**Improved underlays** – Using enhanced intelligence, this tool offers you underlay options that ensure even greater embroidery stability and quality.

**Wings' modular® embroidery software** – Wings' modular provides industry professionals with a tool for viewing, modifying and exchanging embroidery design files. It is based on entry-level software used in the embroidery industry – with the addition of innovative design features and special functions.

## Popular File Formats

Corel DRAWings 2 offers the industry's most popular file formats:

- Save As or Export
- Wings Systems (.ngs)
- Tajima (.dst, .dsz, .dsb)
- SWF (.sst)
- PFAFF (.ksm)
- Happy (.tap)
- Melco expanded (.exp)
- Brother/Baby Lock/Bernina (.pec, .pes)
- Husqvarna (.hus)
- Husqvarna Viking/Pfaff (.vip)
- Janone (.jef, .sew)
- ELNA (.sew)
- JUKI (.M3)
- Toyota (.100)
- Mitsubishi HD (.1??)

## Minimum System Requirements

- Windows® XP, Windows 2000 or Windows Tablet PC Edition
- Pentium® II-MMX/Athlon 1.3 Ghz CPU
- 256 MB RAM
- 800 MB of free, uncompressed hard disk space
- 4x CD-ROM drive
- 3D AGP accelerator with DirectX 9.0c compatible drivers and at least 16MB
- 1024 x 768 monitor
- 1 free USB port
- Mouse or Tablet
